

Train The Trainers

This popular and unique course is specially designed for a small group of educators who wish to discover how to use simulators as teaching tools.

This is a two and half-day course and draws on the independent knowledge Bristol has gleaned from over 10 years course experience. During the course, faculty will be able to provide impartial opinions and advice during hands-on tutorial sessions which allow you to become more familiar with the simulators whilst learning how to construct and debrief a teaching session. Time will also be spent on scripting skills and small groups will be lead through the process of evolving course material in great depth.

Highlights / Objectives:

- Technical set-up of SimMan, HAL
- Educational theory and the simulation cycle
- Scenario design
- Scenario scripting
- Debriefing
- Practical moulage workshop

Target audience: Healthcare professionals with an interest in simulation and teaching

Format: 2,5 day course

Venue: Rahmi M. Koc Academy of Interventional Medicine, Education and Simulation (RMK AİMES), Istanbul TURKEY

Hours: 09:00-16:00 (first two days) 09:00-11:30 (last day)

Fee: 850 Euro (course registration fee) 1.050 Euro (course registration+3 night accomodation)

Organized by: BMSC with collaboration Medical Simulation Society (Medikal Simulasyon Derneği – **MedSimDer**)

** This course has been approved for 8 CPD points by the Royal College of Anaesthetists*
